GEOSPATIAL MAPPING SYSTEMS ANNOUNCES TECHNICAL PRESENTATION AT TRENCHLESS AUSTRALASIA 2008

SARVER, Penn. - (March 3, 2008) - Geospatial Mapping Systems, Inc. today announced that the Company will be exhibiting and presenting a technical paper on its Smart Probe Pipeline Mapping Systems at the Trenchless Australasia 2008. The exhibition will be held March 2nd thru March 5th at the Waterview Convention Centre in Sidney, Australia.

The prestigious international event is sponsored by the Australasian Society for Trenchless Technology (www.astt.com.au).

Linda Ward, Geospatial's Executive Vice President of Business Development, will be presenting the technical paper. Geospatial's slide show presentation will be available at www.geospatialcorporation.com for the next several months.

About Trenchless Technology

Trenchless Technology is the science of installing, repairing or renewing underground pipes, ducts and cables using techniques which minimize or eliminate the need for excavation.

There are many benefits of Trenchless Technology which include the need to install, replace or renovate an underground utility service at the least cost; minimize damage to highways and disruption to traffic; minimize any adverse impact on the environment; and to maximize the safety aspects for both the worker and the public.

About the Australasian Society for Trenchless Technology

The Australasian Society for Trenchless Technology (ASTT) is a non-profit society. Membership is open to all who are concerned with the provision of gas, water, sewerage, drainage, roads, telecommunications and electrical services. The ASTT is part of the International Society of Trenchless Technology (www.istt.com), an affiliation of societies in over 20 countries worldwide. The principle aims of the ASTT are:

- To advance the science and practice of Trenchless Technology for the public benefit.
- To provide a forum in Australia and New Zealand for the interchange of knowledge and skills in the field of Trenchless Technology.
- To encourage the interchange of specialist knowledge and practices in Trenchless Technology within Australia, New Zealand and overseas.

About Geospatial

Geospatial Mapping Systems, Inc. is an infrastructure technology company which utilizes proprietary Smart Probe technologies to accurately and economically map underground piping systems and manage this data using innovative 3-D Geographic Information System (GIS) databases.
